PROFESSIONAL SUMMARY

Full Stack Developer with +7 years of experience in building and deploying dynamic web applications. Expert in PHP, Laravel, Node.js, and JavaScript, with front-end expertise in Vue.js and Bootstrap. Holds a bachelor degree in computer engineering with back-end experience in Node.js, AWS, and Python. Proficient with MySQL, MS SQL Server, and MongoDB for database solutions. Experienced in implementing CI/CD and utilizing GitHub for efficient build and deployment cycles, as well as versed in Agile principles to enhance team productivity and project manageability. Skilled in cross-functional collaboration, I excel at communicating effectively with both technical and non-technical stakeholders, ensuring that project requirements are met with precision and stakeholders are consistently informed throughout the development lifecycle.

SKILLS

Languages and Frameworks:

- PHP, JavaScript
- Laravel, Lumen, Node.js
- Express.js, NestJS
- Vue.js, React.js
- HTML, CSS, jQuery, Typescript

Front-End Technologies:

Expertise in Vue.js, Vuetify, CSS, Sass/Less and Bootstrap, React, to visually appealing and user-friendly interfaces.

Back-End Development:

- PHP with Laravel and

Database Solutions:

Extensive experience with MySQL, Redis, GraphQL and MongoDB for efficient and optimized data management.

CI/CD Implementation:

Proven track record in implementing Continuous Integration and Continuous Deployment processes for streamlined development workflows.

Lumen

- Node.js with Express.js and NestJS
- REST API development

Version Control: Utilizes GitHub for efficient version control, ensuring collaborative and organized development cycles.

Agile Principles: Applies Agile principles to enhance team productivity and project manageability.

WORK HISTORY

Full Stack Developer • Rentrax Software Inc

Vancouver, BC • Nov 2022 to Jan 2024

- Revamped rental software into a (SaaS) model using Laravel and Nest.js, leading to enhanced efficiency and reduced costs. As a fullstack developer, I spearheaded the transformation, integrating diverse payment providers for increased flexibility. Utilized Vue.js for frontend development, specializing in credit card tokenization and terminal device processes. Deployed and configured using AWS and CI/CD pipelines for seamless deployment.

Backend Developer • Tether Land

Dubai, UAE • May 2021 to Nov 2022

- As a backend developer, I orchestrated the creation of a cryptocurrency exchange platform using Laravel and Node.js (Express.js), integrating MySQL and Redis databases. I ensured the implementation of essential features for a secure user experience. Leveraging Typescript and Prisma, I developed scalable backend solutions within the Express.js framework. Additionally, To bolster system responsiveness, I incorporated event queue processes for efficient management of asynchronous tasks.

EDUCATION

B.Eng. - Software Engineering • Chamran University

Ahvaz • 2011 - 2014
